SUMMARY

Full-stack and mobile Software Engineer specializing in **Flutter**, the **MERN stack**, and emerging **AI technologies**. Proven track record of building production-grade cross-platform applications and integrating **LLM-powered features (Gemini API, RAG, agentic workflows)** into user-facing products. Adept at bridging the gap between technical execution and business value across mobile development, backend APIs, and DevOps (Docker, Kubernetes).

TECHNICAL SKILLS

- **AI & LLMs:** Retrieval-Augmented Generation (RAG), Agentic AI, Gemini API, LangChain fundamentals, TensorFlow, Keras, CNNs, OpenCV.
- **Programming:** C++, C#, Python, Java, PHP, Kotlin, Dart, JavaScript.
- **Web & Mobile:** Flutter, React Native, Node.js, Next.js, MERN Stack, HTML5, CSS, Tailwind CSS, Provider, GetX.
- **Databases:** Firebase, SQL, NoSQL.
- **Cloud & Tools:** Google Cloud Platform, AWS, Docker, Kubernetes, Git/GitHub, REST APIs, Unity.
- **Professional:** Client Relations & Business Development, Requirements Gathering, Agile Collaboration, Technical Training.

WORK EXPERIENCE

Associate Product Developer & Lead Generator | Dysol Pvt. Ltd, Lahore

Apr 2026 – Jul 2026

- **Product Strategy & Research:** Analyzed emerging tech trends, competitor landscapes, and industry-specific software demands to guide the development of high-impact technical products.
- **Business Development & Sales:** Spearheaded lead generation and client engagement, successfully pitching tailored software solutions and negotiating deals to drive revenue growth.
- **Cross-Functional Execution:** Acted as the strategic bridge between technical teams and prospective clients, ensuring software features directly addressed market needs and delivered tangible business value.

Flutter Developer | Naqvix, Lahore

Sep 2025 – Apr 2026

- **Cross-Platform Development:** Designed and shipped clean, user-friendly mobile applications end-to-end using **Flutter**.
- **State Management:** Implemented scalable architecture with **Provider** and **GetX**, optimizing dynamic **ListView** rendering for a measurably smoother UX.
- **Collaboration:** Worked directly with designers and backend engineers to translate product requirements into production-ready features on schedule.

Software Developer & Project Assistance | Freelance

May 2025 – Present

- **Client Delivery:** Deliver end-to-end web and mobile applications for international clients using the **MERN Stack** and **Flutter**.
- **Business Development:** Manage client communication, scope, and timelines directly—gathering requirements and pitching tailored technical solutions to drive project success.

Associate Deployment Engineer | Technamax, Lahore

Feb 2025 – Jun 2025

- **System Support:** Supported the deployment and maintenance of educational portals and **ERP/POS/HR** systems under operational management.
- **Reliability:** Assisted with environment configuration and release support to maintain high uptime and keep production systems stable.

Teaching Assistant | Lahore Garrison University

Dec 2024 – Feb 2025

- Assisted Dr. Muhammad Abubakr in delivering the **Internet of Things (CSC-383)** course and supported advanced student analytics research.

Trainer | Garrison Engineering and Robotics Society (GEARS)

Feb 2023 – 2024

- Delivered hands-on training on **Arduino** and embedded systems (**Raspberry Pi**) alongside the Head of Robotics Umar Ahmed.

PROJECTS

Calorimeter – AI-Powered Dietary Tracking & Nutrition Assistant

AI / Mobile Developer | Flutter, Python, PyTorch, Vision Transformer (ViT), REST APIs

- **Computer Vision:** Fine-tuned and deployed a Vision Transformer (ViT) model to classify 100+ complex food classes, accurately estimating portion weights and macronutrient breakdowns.
- **Conversational AI:** Integrated an intelligent chat assistant to provide real-time, personalized dietary guidance and support based on visual meal analysis.

LESCO Crisis Management System

Full-Stack / Mobile Developer | Flutter, Node.js, Gemini API, Firebase, Google Maps API

- **AI-Automated Monitoring:** Built a crisis-monitoring app aggregating social media feeds and Google Maps data for real-time, localized visibility into electricity and grid station outages.
- **Agentic Chatbot:** Integrated a **Gemini API**-powered chatbot delivering priority-based analytics and automated troubleshooting workflows.

Crop Doctor

ML / Mobile App Developer | Python, Keras, TensorFlow, AWS SageMaker, Flutter

- **Deep Learning:** Used a **CNN** model, **ResNet50**, **Keras Sequential Model** to classify and detect (Conv2D, MaxPooling2D, Flatten) crop leaf disease from photos, successfully deploying it through a Flutter front end.
- **Cloud Architecture:** A robust cloud infrastructure combining **AWS S3** bucket and **Heroku Django** Backend.

Deen – Quran & Prayer Times App

Mobile App Developer | Flutter, Provider

- Developed a Quran recitation and prayer-time companion app with a highly responsive, native-feeling UX utilizing a **Provider** state-management architecture.

Local E-Commerce Storefront

Full-Stack Developer | Next.js, JavaScript, FastAPI, MongoDB Atlas, Firestore, PayFast

- **Full-Stack Architecture:** Developed a high-performance digital storefront utilizing **Next.js** and **FastAPI**, leveraging **MongoDB Atlas** for scalable product catalogs and **Firestore** for real-time inventory synchronization.
- **Payment & Deployment:** Integrated a secure checkout pipeline via **PayFast** for local bank wallet transactions and automated deployment using **CI/CD** workflows to deliver a custom order-management system tailored to a local market client's needs.

Chit Chat Messaging App

Mobile Developer | Flutter, Firebase

- Published a cross-platform real-time messaging app on the **Google Play Store**, extending functionality with AI chatbot integration.

12-Bead Traditional Board Game

Game Developer | Unity 2D, C++, C#, Kotlin

- Rebuilt the traditional 12-Bead board game as an Android application, programming full game logic, physics, and UI natively in **Unity 2D**.

Handwritten Digit Recognition

ML Developer | Python, CNN, MNIST

- Trained a **CNN** on the MNIST dataset and extended inference capabilities to accurately process real, camera-captured handwritten digit images.

EDUCATION

Bachelor of Science in Computer Science

Lahore Garrison University, Lahore

2020 – 2024

CGPA: 3.1/4.00

CERTIFICATIONS

- IBM RAG & Agentic AI Certification – IBM (Coursera)
- Java Spring Boot and Spring Cloud – GCP (Coursera)
- AWS Ship with KIRO Hackathon Certification – AWS Student Builder Group
- GDG Cloud Seekho Hackathon – Google Developer Group
- MongoDB Certification – MongoDB Atlas (Udemy)
- AWS Serverless Application – AWS (Coursera)
- OpenCV Bootcamp – OpenCV University
- Samsung AI BootCamp – Samsung Innovation Campus
